Multi-Sector Collaboration in an ACH: Logic Model

Enabling Conditions

Existing Community Strengths
- Relationships & partnerships
- Infrastructure
- Expertise
- Leadership

External Initiatives
- Existing related interventions
- Technical Assistance

Major Health Care Delivery System Participation

Funding
- Federal
- State/Local
- Private

Context and Environment

Delivery System Reform

Political Climate

Community Climate

Social Climate

Experience with collaborative efforts

Economic Factors

Competition

Readiness for change

Backbone and Governance Functions are aligned around a shared vision and embrace:
- Multi-sector representation, communication, & coordination, including community engagement
- Definitions of roles of key actors
- Engaged leaders
- Alignment of resources (financial or other)
- Adoption of a value case
- Identification of community needs
- Shared measurement and accountability metrics
- Integration and adoption of equity, diversity, and inclusion principles

Systems Design and Development

Portfolio of Interventions
Based on the shared vision and common agenda, with equity as a core principle

Implementation of Interventions
- Feedback loop between all stakeholders
- Continuous learning ensuring equity
- May be related to policy, systems, or environmental change

Investment in Technology
- Across systems: health, social services, others
- Interoperable

Actionable Data
- Accessible by all participants
- Used to inform decision-making
- Used for accountability

Sustainability Strategy
- Shared vision is embraced by community
- Dependable resources secured (e.g., braiding and blending of funding streams, VBP, other)
- Realignment of funding streams to support community-driven priorities
- Value case is reaffirmed or redeveloped

Backbone/ Integrator Functions Established

Governance Established

Creation of a Portfolio of Interventions

Implementation of the Portfolio of Interventions

Investment in Technology

Actionable Data

Developed Sustainability Strategy

Commitment to Reinvestment

Feedback Loop

Long Term Outcomes

Short Term Outcomes

Short Term Outcomes
Value proposition is defined
- Short Term ROI (financial and non-financial)
- Accountability metrics

Engaged leaders and community

Infrastructure for systems change

Improved health equity

Improved community well being

Improved health outcomes

Alleviated health-related social needs

Enhanced HIT system
- Data aggregation
- Cross-sector planning informed from patient data

Long Term Outcomes
Value proposition is defined
- Long Term ROI (reduced costs to all engaged sectors)

Engaged leaders and community

Metrics hold participants accountable for outcomes

Systems change

Change in community narrative growing from the shared vision

Improved health equity

Improved community well being

Improved health outcomes

Continuous data driven collaboration
- In new or adjusted initiatives
